RIDE THE TOLL

It's not that easy to fit an E-tag to your bike but JSG has come up with a great solution, with the TollRider. We fitted one to our KTM and it works a treat. Essentially you can get a Toll Rider in three sizes, small to large.

Small will take the E-Way and Roam toll tag, medium the RTA Toll tag and large the old E-Way and Roam toll tags.

The waterproof pouch is designed to go the distance and even looks good, if you are worried about such things.

It's magnetic so sticking it on the tank is perfect.

Alternatively there's a handlebar clamp in the kit if your tank isn't steel.

Perfect for toll commuting on the bike.

PRICE: \$38.50

AVAILABLE FROM: Via website

THE DENIM LOOK

ON A recent trip to sunny Queensland it was anything but sunny - at least on the way up.

We were fitted out with the latest Tourmaster Cortech DSX Denim jacket and pants which did an awesome job of keeping the chills at bay, even riding through snow up near Walcha.

The jacket and pants come with removable CE-approved armour and seriously this is the most comfortable jacket we've ever had on.

For summer time you can take out the liner and zips allow flow through ventilation. Sizes are available to suit most body shapes and Tourmaster also has the Indigo denim jacket for the ladies.

Denim is back we reckon.

PRICE: jacket \$199, pants \$159; Indigo jacket \$199

AVAILABLE FROM: Good bike shops everywhere
